## PROFESSIONAL SUMMARY

B.Tech Information Technology undergraduate with experience building full-stack web applications using React.js, Node.js, Express.js, PostgreSQL, and TypeScript. Skilled in designing REST APIs, responsive user interfaces, and scalable backend systems, with a strong foundation in OOP and Agile development.

## TECHNICAL SKILLS

**Languages:** Java, SQL, JavaScript (ES6+), TypeScript
**Frontend:** React.js, HTML5, CSS3, Tailwind CSS
**Backend:** Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
**Databases:** PostgreSQL, MongoDB, MySQL
**AI & Automation:** OpenAI API, Google Cloud Gen AI Builder, NLP, n8n (Self-Hosted)
**Tools & Platforms:** Git, GitHub, Postman, VS Code, Docker (Basic), AWS (Basic), Vercel, Render
**Core Concepts:** OOP, Data Structures & Algorithms

## EDUCATION

**Parul University** 2023 – 2027
B.Tech in Information Technology Score: CGPA: 7/10.0

**Vidyamangal Residential School** 2020 – 2022
SSC (X) | HSC (XII) Score: 72.00% | 63.23%

## EXPERIENCE

**Web Design and Development Intern** at iStudio | Remote Mar 2025 – Sep 2025

- Completed structured training in web design and development, focusing on modern frontend development concepts and responsive design principles.
- Designed and developed a responsive e-commerce website using HTML, CSS, JavaScript, and best UI/UX practices.
- Performed testing, debugging, and application optimization to enhance usability and responsiveness, applying Agile methodologies throughout the process.
- Utilized Git and GitHub for version control, ensuring collaborative development and code management while documenting technical solutions.

## PROJECTS

**Crevio : Contract Execution & Influencer Marketing Platform** | React 18, TypeScript, Node.js, Express.js, PostgreSQL, Socket.IO, OpenAI API

- Designed a multi-stage contract lifecycle pipeline (Pending → Locked → Executed) with PDF term extraction, dual brand/creator e-signatures, and SHA-256 cryptographic terms hashing for immutability.
- Engineered an automated decision engine to evaluate deliverable verification status, deadline compliance, and FTC disclosure rules, generating confidence scores and blocker reason traces.
- Developed a Brand-Creator Campaign Marketplace allowing brands to publish multi-platform campaigns and creators to submit targeted pitches, deliverable proposals, and portfolio proofs.
- Implemented a multi-dimensional Creator Fit Scoring system (engagement_quality, content_quality, audience_fit, reliability) to evaluate application fit and streamline term negotiations.
- Applied clean RESTful API design patterns and relational PostgreSQL database migrations (Neon DB) with real-time Socket.IO event notifications to ensure system scalability and data integrity.

**TrainIntern** | React.js, TypeScript, Node.js, PostgreSQL, N8N, CashFree, Resend, OpenAI API https://trainintern.tech/

- Built a full-stack internship management platform using a 3-tier architecture with React.js, Node.js, Express.js, and PostgreSQL.
- Designed a responsive, component-based UI achieving high performance using React 18 and Tailwind CSS.
- Developed REST APIs to manage secure user logins, internship applications, and task management, adhering to best practices in API integration and server-side development.
- Implemented JWT authentication and input validation, ensuring security against common vulnerabilities while following DRY principles.
- Integrated Cashfree Payment Gateway for secure transaction processing and automated deployment workflows using CI/CD with GitHub Actions.
- Applied Exception Handling and CRUD Operations in database interactions to ensure robust data management, showcasing a solid understanding of relational databases and performance optimization techniques.

**CandidateAI** | React.js, FastAPI, PostgreSQL, spaCy, OpenAI API

- Built a full-stack AI-powered placement platform featuring resume screening and candidate evaluation workflows.
- Designed a 3-tier architecture to integrate a custom NLP engine and OpenAI APIs, managing complex business logic for resume matching.
- Developed an automated backend pipeline for database operations, normalizing datasets of over 2,000 job roles, utilizing PostgreSQL for data management and ensuring efficient CRUD operations.
- Implemented skill extraction and resume parsing workflows, enhancing candidate-role matching accuracy.
- Applied Design Patterns to improve code maintainability and scalability.

## ACHIEVEMENTS & EXTRACURRICULARS

- Certifications: Full Stack Web Dev (Delta - Apna College), DSA with Java (Alpha - Apna College), Python Programming (Kodacy), Generative AI (Kodacy).
- Leadership: Led an RC Car Engineering Project team, coordinating design, assembly, and project execution activities.
